Have you ever met a fairy that couldn't fly?

LollyStops is an animated series for children focusing on the adventures of Lolly, the fairy who cannot fly. Set in the land of Lolore against the picturesque scenery of Mount Silil, this is high fantasy in a realm created, not by magic, but by the Elements of Genesis.

An escape into imagination, LollyStops is a world of lush, beautifully crafted landscapes populated by ogres, elves, mermaids, and a host of other mythical characters. The stories capture the positivity of Dora the Explorer with the fairytale breadth of Frozen, packaged for a new generation.

As a child with her own limitations, Lolly is a steward of hope. Together with her friends she will explore topics ranging from how to outsmart an ogre to acceptance of others' differences. She will reinforce each episode with an ending message of learning, positivity, and self-worth because she has one goal...to change the world one heart at a time.

It's in the name. LollyStops...bigotry, hate, self-loathing, and bullying. Lolly stops at nothing to show every child they are unique, priceless, and loved.

LOLLY

Lolly is a talkative, high-energy force of nature. It's not until she stops to take a breath that you realize her wings don't work. There's nothing she can't accomplish. She believes in herself. If there's excitement, Lolly's in the heart of it. Learning new things, making new friends, and conquering the impossible is just an average day for her.

Lolly is unable to fly due to an illness but, she barely has time to think about it. Even the loss of her hair doesn't slow her down.

Instead, she's got her extravagant LollyTop. This collection of fabrics, flowers, and feathers has been adapted to meet all of Lolly's adventuring needs.

TAAN

Taan is a sprig, one of Lolore's only sentient plant lifeforms. Sprigs are unique in their ability to phase from one gender to another by choice. Taan, however, is allergic to pollen. So, when they sneeze, she becomes he, and vice versa. Being an elemental phenom, Taan has mastery over nature.

In male form, he can transform his body into any plant he touches, giving him a wide variety of abilities. In female form, she can call on the sprig's source of power, the Great Vine of Wisdom, bringing it to her on command. Together with Lolly, they get into some fun predicaments.

GAPTH

Gapth is the product of an ancient bloodline of great barguests. That's why he's smarter than the rest of the pack. Trained to battle, he's been freed from his conditioning by Lolly. Now, he's bandaged and on the mend. Making Lolly his personal charge is a lot less dangerous than serving an ogre king...but not by much. Enjoying the good life of unlimited snacks and the occasional adventure, this little barguest is the perfect companion to the fairy that cannot fly.

SCHNOODLE

Schnoodle has a problem...he's afraid to come out of his shell. Being a dragon doesn't help his self-confidence one bit. Wrapped in an indestructible exterior of effetam, he's safe from the world as long as he stays inside. Being Lolly's friend challenges this constantly. She's coaching him on trust but getting him into scrapes with ogres at the same time. Surrounded by an array of brave heroes, Schnoodle hopes one day he'll be free of his uncertainty.

HEPTNUM

This ogre-pirate is a rotund, bumbling buffoon, bent on retrieving his king's missing barguest, Gaph. Heptnum's also on the lookout for the fairy who liberated the pup from his training camp. His attempts are thwarted time and again by a combination of his own ineptitude and Lolly's cunning know-how. That doesn't keep him from coming back with new tactics. His failures are as priceless as they are numerous.

BEE-BEE

Bee-Bee is an orphaned stingray that thinks he's found a family in Heptnum. Assured by his ogre companion that a reward of notoriety and greatness awaits him in the king's court, Bee-Bee lends his magnetic scouting skills to an array of outlandish schemes. A master of camouflage and espionage, Bee-Bee pours himself into his disguises, often forgetting which side of the situation he's on. This is one stingray you can't trust from either end.

MOUNT SILIL AND THE ETHEREAL FALLS

SAMPLE EPISODES

Episode 1: *LollyStops for an egg*

Lolly discovers a curious egg while out for a walk in the forest. It soon becomes clear that her new friend is in need of help finding his lost mother. Though she cannot fly, Lolly knows her home on Mount Silil, and quickly builds a plan to save the day. Their adventure to get Egg above the treetops will bring the little fairy face to face with a majestic, mountainous dragon.

Episode 2: *LollyStops for a pup*

Lolly's back in the Elvin Trillage of Echlaroop to visit her friend, Nelroth. The elf is not home when Lolly arrives but there's a beastly figure sitting in her bed. A barguest has made himself at home and the fairy isn't sure what to make of him. With a stuffed toy fish, Lolly faces the danger. Finding him bandaged and healing, Lolly sees something of herself in this pup that will ultimately become her very best friend for life.

Episode 3: *LollyStops a disagreement*

It's hard being one of a kind and Lolly knows all too well what that's like. Being the only fairy without flight helps her confront the criticism her friend, Taan is facing from other sprigs. As plants, sprigs can change genders when they want to. However, Taan is allergic to pollen and when they sneeze, their gender changes automatically. Other sprigs find this hard to accept until Lolly shows that Taan is the same amazing being on the inside, regardless of what's on the outside.

Episode 4: *LollyStops an ogre caper*

A strange ship has set ashore on the beach of Silil and Lolly knows the pirate-ogre striding down the gangplank. It's the barguest trainer Heptnum, and he's come to take Gaph back to the king. When a suspicious stingray named Bee-Bee comes snooping around, Lolly gathers her friends together to help hide her puppy. Heptnum is hapless but determined, giving Lolly an adventure she won't soon forget. It's a marathon of ill-fated run-ins and one tremendously daring escape.
